

Have you ever wondered???

If your garage door was closed?
If your guests are about to arrive?
How your babysitter is with your children?
What that noise was outside?

Stop Wondering...
We can help you know for sure!

**WARNING: These Premises are under
24HR Video and Audio Surveillance**

KEY Available Features:

VIEW all activity locally and remotely, day or night. See if a package is at the door, if the garage door is shut, if the children made it home from school, or if the housecleaners have left yet.

DISPLAY all or designated camera images on a monitor in the kitchen and/or bedroom, and on any or all TVs throughout the house.

NOTIFY/ALERT when a visitor arrives, someone is outside the window, or when the pool area is entered.

CONTROL devices, such as lights, locally and remotely through integrated automation.

RECORD all activity locally and back it up locally or remotely.

PLAYBACK all motion events (or scheduled recordings) locally and remotely on a remote PC or PDA cell phone.

POSITION PTZ (Pan Tilt Zoom) cameras locally and remotely.

FACE DETECTION to capture faces of people entering and exiting.

COUNT the number of guests entering your home, or number of cars driving by your house.

LPR (License Plate Recognition) to see who has been driving by.

PDA Cell Phone capabilities include seeing live streaming images, playing back events, and controlling devices.

Capable of remotely viewing, controlling, and adjusting the CCTV surveillance system using Internet Explorer. No special programs needed.

All this available at no additional monthly cost if broadband internet access is already present. Dynamic IP support, no need to purchase expensive static IP address.
